SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Paul's Slide, State Route 1, Monterey County

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- · Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- · Assessment will commence and further details will be provided once released.
- All deliveries and local access previously scheduled have been suspended.

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will reopen.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Placer County: Truckee River at Truckee
- Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

Please see link for River Forecast Guidance - http://www.cnrfc.noaa.gov/

Cal OES Southern Region

River Forecast - The following river is forecast to meet or exceed Flood stage: Mono County:

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.2 feet the morning of 06/04/17.
 - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

Please see link for River Forecast Guidance - http://www.cnrfc.noaa.gov/

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

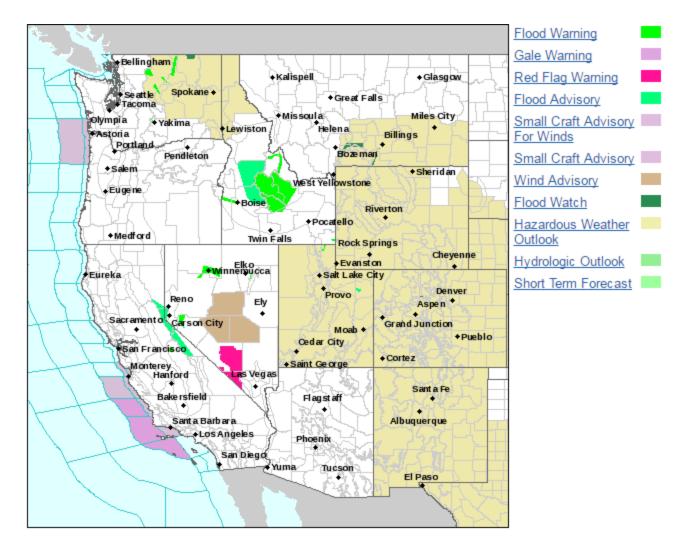

The high pressure ridge that had been over Northern California in recent days has moved off to the east and a Gulf of Alaska low pressure system will be the main influence on Northern California's weather through mid-week. Isolated showers or thunderstorms are also possible in the Sierra south of Highway 50. The area of clouds and showers moving in from the northwest will spread east and south remaining north of a line from Arcata-Chico-Placerville this morning. Most areas will see less than 0.25 inches, but some higher elevations may see 0.25-0.50 inches. S-W winds will be slightly lighter today and Thursday. Temperatures will be 4-8 degrees below normal on Wednesday, then near normal again on Thursday. The low will move off to the east on Thursday and a relatively flat upper level flow will persist for a few days, producing mild conditions with light winds. Another low pressure trough will move in Sunday and produce cooler than normal temperatures and gusty winds for a few days. Clouds along with a few showers and thunderstorms will be more common in the north.

SOUTHERN CALIFORNIA

An exhibition of typical late May/early June weather is anticipated over the course of the next few days. Expect extensive marine layer coverage along with warm temperatures and hazy sunshine further inland with only minor day-to-day variations of temperature, wind and relative humidity (RH) through the end of the week. Today, a trough passing through the northern half of the state will result in slightly cooler temperatures across the entire district. Isolated showers and thunderstorms will be possible in the Sierras this afternoon, but otherwise, expect little in the way of cloudiness in the high country this week. Drizzle or very light rain may occur in Monterey County this afternoon as well. Along the central coast, expect northwest winds of 15-25 mph with higher gusts to develop this afternoon and evening. Similar southwesterly winds will develop in and near the desert. Onshore flow will keep many inland valleys of Southern California from seeing much sunshine. Thursday and Friday, a weak ridge will bring slightly warmer and less breezy weather to the region. Less marine layer coverage will allow for highs to reach the lower to mid 90s in the valleys again Friday afternoon with minimum RH in the teens once again. Cooler weather along with a more extensive marine layer will arrive this weekend.

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Missions

Nothing significant to report at this time.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
